(54) Title: SEAT WITH TEMPERATURE CONTROL AND VENTILATION AND SAFETY SYSTEM FOR A VEHICLE

(57) Abstract: The invention relates to a device for temperature control and ventilation of a seat comprising a cooling device. The invention is characterized in that the seat comprises an electrical heater and a detector unit in connection to the electrical heater for detection of a temperature at said electrical heater, where the cooling device and the electrical heater are activated in dependence of at least the detected temperature. The invention also relates to a method for such a temperature control and ventilation. The invention also relates to a security system at a vehicle. By means of the invention, a better adjustment of temperature and ventilation of a seat is provided, with the possibility to eliminate humidity without chilling the user.

#### A. CLASSIFICATION OF SUBJECT MATTER

IPC7: G05D 23/19, B60K 28/06, B60N 2/56
According to International Patent Classification (IPC) or to both national classification and IPC

#### B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

#### IPC7: G05D, B60K, B60N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

#### SE, DK, FI, NO classes as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

International application No. PCT/SE 01/01521

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This inter	national search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
-	Claims Nos.: 16 because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:  PCT Article 6
	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Вох П	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
I. C	national Searching Authority found multiple inventions in this international application, as follows:  laims 1-11, 13-16  eat with temperature control and ventilation  laims 12, 17  afety system for vehicle
2. X	As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark o	n Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.
